The screenshot shows the Kubernetes dashboard interface. At the top, there is a header bar with the Kubernetes logo, a dropdown menu set to 'default', a search bar, and icons for adding, notifications, and user profile. Below the header, a blue navigation bar shows 'Workloads > Deployments'. A left sidebar contains a list of navigation items: Workloads (with a sub-menu icon), Cron Jobs, Daemon Sets, Deployments (highlighted), Jobs, Pods, Replica Sets, Replication Controllers, Stateful Sets, Service (with a sub-menu icon), Ingresses, Services, Config and Storage, and Config Maps (with a sub-menu icon). The main content area is divided into three sections. The top two sections are 'CPU Usage' and 'Memory Usage', both displaying 'Waiting for more data to display chart...'. The bottom section is titled 'Deployments' and contains a table with the following data:

Name	Images	Labels	Pods
<span>jobportal</span>	<a href="#">Show all</a>	<a href="#">Show all</a>	1 / 1
